

SUPER DYNAMIC - COMBAT (SD-C) TRIGGER
SUPER DYNAMIC - ENHANCED (SD-E) TRIGGER
SUPER DYNAMIC - 3 GUN (SD-3G) TRIGGER

The Geissele Super Dynamic Triggers are the Super Dynamic - Combat (SD-C), Super Dynamic - Enhanced (SD-E) and the Super Dynamic - 3 Gun (SD-3G). These triggers are a unique semi-automatic variant of a trigger that Geissele makes for customers in the U.S. Special Operations Community. The Super Dynamic Triggers are rugged, non-adjustable combat triggers with a sear design that provides a wide margin of safety against unintentional discharges yet still gives the operator a sharp, repeatable trigger release. The exclusive, flat trigger bow, patterned after the trigger of an M1911 pistol, reduces the perceived pull weight of the triggers and gives outstanding tactile feedback and trigger control.

Super Dynamic - Combat Trigger

The Geissele Super Dynamic-Combat (SD-C) Trigger is a semi-auto only version of the select-fire trigger that Geissele makes for customers in the U.S. Special Operations community. The SD-C is a rugged, non-adjustable combat trigger with a sear design that provides a wide margin of safety against unintentional discharges yet still gives the operator a sharp, repeatable trigger release. The SD-C's positive functioning and extreme reliability is ideally suited for weapons used in harsh, demanding environments such as Close Quarters Battle (CQB) and Squad Designated Marksman (SDM) applications.

Retail Price: \$230

Super Dynamic - Enhanced Trigger

The Geissele Super Dynamic-Enhanced (SD-E) Trigger is a finely-tuned semi-automatic-only version of our full-auto, two stage combat trigger presently used in the U.S. Special Operations Community. Built on the chassis of the Geissele SSA, the SD-E provides enhanced trigger control and weapon accuracy while maintaining the robustness and reliability of our combat-proven two-stage trigger. The

SD-E's reduced 1st and 2nd stage pull weights result in a trigger with a smooth, light 1st stage take-up and a crisp, candy cane-like 2nd stage break. The SD-E is ideal for use in precision Squad Designated Marksman type rifles where weapon accuracy and reliability are critical and a non-adjustable drop in trigger is desired.

Retail Price: \$250

Super Dynamic - 3 Gun Trigger

The Geissele Super Dynamic-3 Gun (SD-3G) trigger is a semi-automatic-only derivative of the two-stage Super Select-Fire (SSF) combat trigger that Geissele Automatics produces for customers in the U.S. Special Operations Community. The SD-3G was developed to combine the SSF combat trigger's match-grade semi-automatic performance with its smooth single-stage full-automatic feel to make a fast, smooth, and robust trigger ideal for 3 Gun competition shooting. The new Geissele Super Dynamic - 3 Gun trigger has a super short trigger pull and a short reset so that rounds can be sent downrange as quickly as possible while still maintaining superb accuracy.
